

## How to export fixtures

1. Click 'Fixtures' in the Sport Zone on the 'Dashboard', and click 'Export' in the left-hand menu.
2. Select the specific fields you wish to export in the 'Fields' section, and if required customise the name of the field by entering an alias.
3. In the 'Controls' section, select the following:
  - a. The start and end date range for your export.
  - b. The format in which you would like the export to be.

The screenshot displays the 'Export' interface for fixtures. It is divided into two main sections: 'Fields' and 'Controls'. The 'Fields' section on the left allows users to select specific fields for export and customize their names with aliases. The 'Controls' section on the right allows users to define the date range and the export format.

Field	Selected	Alias
Status	<input checked="" type="checkbox"/>	Type an alias
Start Date	<input checked="" type="checkbox"/>	Type an alias
End Date	<input checked="" type="checkbox"/>	Type an alias
Start Time	<input checked="" type="checkbox"/>	Type an alias
End Time	<input checked="" type="checkbox"/>	Type an alias
Sport	<input checked="" type="checkbox"/>	Type an alias

Control	Value
Start Date	05/01/2017
End Date	18/01/2017
Format	Excel Binary File Format (.XLS)

**Export**

### The Export 'Fields' and 'Controls' sections

4. Click the 'Export' button to export your fixtures.
5. The export will then download and you will be able to access it from your downloads folder.
